Abstract: An abstract of maximum 150 - 250 words should be appropriate for this section. Clearly state what is new in this first paragraph. The degree of novelty and clearness will be two major evaluation criteria in the review process. Relate your work to what has been already done. This section should describe your major achievements and should offer a short overview plus the main conclusion of your scientific contribution in a nutshell. Do not submit papers that have already been published elsewhere.

Keywords: List three to five descriptive words of your 2-pages scientific abstract.
